Universal remote for Shading

Company Background: For nearly a decade Cyanview has been developing camera shading solutions, initially focusing on specialty and mini-camera integration for the OB market. Today, the company delivers innovative solutions for the broadcast industry, cinematic live events, and remote production.

Range of products or solutions: Cyanview RCP is a universal remote control panel compatible with any camera. Any number of cameras can be controlled from a single RCP and any number of RCP's can be used simultaneously. The CIO and RIO modules add camera and lens control over any communication channel.

Added Value / Unique Selling Point: Cyanview system covers camera shading and tally for all cameras, from ENG to D-Cinema camcorders and PTZ. Being IP-based, the Cyanview system is ideal for any kind of production, even for remote production, over the public internet, cellular or on private networks.

jb.lorent@intopix.com

PREMIUM AV-OVER-IP TECHNOLOGY

Company Background: Intopix creates innovative compression and av transmission technologies for OEM, AV integrators and professional users.

Range of products or solutions: IPMX & SMPTE 2110 AV-over-IP
Software Apps : TitaniumViewer, Show and SDM
Advanced JPEG XS codec IP cores for FPGA & CPU/GPU up to 8K :
TicoXS FIP
IPMX SDK for AV-over-IP: TitaniumSDK
FPGA SoC / SoC EDK for IPMX AV-over-IP : TitaniumEDK4.

Added Value / Unique Selling Point: intoPIX enables premium, low-latency and bandwidth-efficient AV workflows. Its technologies deliver visually lossless quality, high reliability and seamless interoperability and userexperience, from HD to 8K. Ideal for AV-over-IP, KVM, live events, wireless AV, LED walls and control rooms.

Main References: AJA, Christie, Crestron, EVS, Lawo, Grass Valley, Matrox, Panasonic, Plexus AV, Riedel, Sony, ...

Certifications: Certified Technology partner of Altera, AMD Xillinx, Intel, NVIDIA and Lattice. Active member ofAIMS/IPMX, JPEG, MPEG, SMPTE, VSF, and the TICO Alliance.

benjamin.lardinoit@on-hertz.com

DSP platform for corporate AV

Company Background: We are pioneers in software-defined DSP. Our mission is to amplify your corporate AV production capabilities, enabling you to deliver outstanding content anytime, anywhere, at any size.

Range of products or solutions: Artisto is an audio-first flexible production. It delivers professional audio routing, mixing, processing, and AoIP/VoIP contribution in a fully software-defined solution. Easy to deploy and scale, Artisto integrates seamlessly into complex, IP-driven AV workflows. Built for reliability and high availability, it replaces rigid, hardware-centric audio systems.

Added Value / Unique Selling Point: Built on proven broadcast technology for mission-critical reliability. Natively video-friendly, integrating seamlessly with ST2110, IPMX, NDI, and IP-based AV ecosystems. Fully software-defined, virtualized, and dynamically reconfigurable with no operational downtime. Accessible from any browser, enabling centralized control across rooms, sites, and teams.

Laurent RENARD, CEO
+32477869363
laurent@phoenix-ai.com

Edge on-device AI

Company Background: End to end solutions at an edge on-device perspective for safety, Smart Cities, industries,mobility, with IVA (Intelligent Video Analytics)

Range of products or solutions: PAI BOX, a complete turnkey edge AI solution with software suite, computer vision and AI.

Added Value / Unique Selling Point: A turnkey edge AI solution. Less bandwidth used. No need of cloud(s). Standalone capabilities in AI and computer vision. Openness of frameworks for integrators and partners

Main References: Port of Antwerp, RATP, Securitas, Renault6.

Soundnodes

www.soundnodes.com

Marc BOITEL, CEO

+32 475 2862 48

marc.boitel@soundnodes.com

Audio Intelligence

Company Background: SoundNodes, an AI company creating hardware and software solutions to analyze audio and to collect the data the industry (music, advertisement, healthcare, real state, manufacturing,...) needs.

Range of products or solutions: AudioSpy: multi-stream multimedia logging system (audio / video, analog, digital, web, ...)

Capture Hub (220, 222, Live, Mini) : Audio recorder for Club, festivals and public spaces

RadioSpy: multi-band monitor offering alerting and remote listening.

SoundID AI: AI-powered automatic content recognition system.

Added Value / Unique Selling Point: A unique combination of self-designed and manufactured HW & SW for audio capture and for audio recognition (IA-based) in any environment from a single vendor. A unique Accuracy and Precision out performing all other algorithms, models, ... detecting any audio content type of any duration in any language even in noisy environment or in background, applicable in various market verticals

Main References: Broadcasters : BelRTL, Contact, Mint, Nostalgie, NRJ, ...

Data generators: SoundAware (Gema / Buma), Yacast (Sacem)

Certifications: NVIDIA Inception Program Member

Interactive Retail Solutions

TAP TAP

www.taptap.be/

Olivier Drèze, Co-Founder

TAP TAP Interactive Retail Solutions

TAP TAP is a phygital platform that unifies hardware, software and financing to turn screens into revenue-driven touchpoints, powered by AI and orchestrated by TAP TAP OS.

THE SALESMAN is built to convert attention into revenue, using event-driven, data-driven content optimized for retail ROI.

THE DOORMAN is a proptech solution that automates corporate reception and visitor flows to cut welcome desk costs, with fast, plug-and-play deployment.

You sell. We do the rest. You bring local market knowledge, sales capacity and investment. You get exclusive territory, a proven model and full support.

Active in the Benelux and France and looking for business partners across all markets, including Italy, Switzerland and Germany.
